Diacarbon Energy's air emissions

Diacarbon Energy Inc will be submitting an application for authorization of the discharge of air emissions from their new wood pellet and torrefaction facility, at 2490 Priest Ave. They will discharge emissions 24 hours per day, 7 days per week, which will include carbon monoxide, nitrogen oxides, volatile organic compounds & sulphur oxides from their thermal oil heater, syngas burner and dryer.

There will also be particulate emissions from the chip storage building, hammer hog, hammermill, wet bin vent, sawdust storage silo & supply bin. And post-pelleting, and fugitive particulate matter, as well as other pollutants.

Anyone who may be adversely affected by the proposed discharge of waste can provide relevant info within 30 days of the ad first posted in the Herald on June 20, 2014.

Diacarbon will also hold a public open house to present info about the project and the application for an air permit sometime this month — watch for details on time & location.

"Hello, FBI? ...I'm calling to report about my neighbour Billy Bob Smith. He is hiding marijuana inside his firewood." The next day, the FBI agents descend on Billy Bob's house. They search the shed where the firewood is kept. Using axes, they bust open every piece of wood, but find no marijuana. They swore at Billy Bob and left. The phone rings at Billy Bob's house. "Hey Billy Bob! Did the FBI come?" "Yeah!" "Did they chop your firewood?" "Yep." "Happy Birthday Buddy."
