### FAGTCJ Climate Change

Who knew we could ever be so happy to see the winds? But now that they have blown away most of the smoke and we can enjoy the outdoors again, it may be easy for us to ignore the realities of Climate Change. No, this isn't a "good time" topic, my friends, but it is time we face facts.

I recently read an article in The Guardian that stated, "One third of the world now faces deadly heatwaves as result of climate change." and another on the Popular Science website entitled, "This is how much of the world is currently on fire" stating "The 2017 fire season is a global phenomenon", showing maps of all the current fires in the world. Mind-boggling!

We are not immune to climate change in the Nicola Valley, although we may have been in denial. But no more. Our crazy cold winter, our sad spring, our flooding, the wildfires burning all around us, and, now, a level 4 drought! Don't kid yourselves that these aren't a result of global warming!

Pay attention, because if we care about the planet, we no longer have the right to drive big cars, build big houses, and have oodles of children. And we cannot wait for the government to tell us what to do, because they are caught between a rock and a hard place ...the environment and the economy. It's up to all of us - NOW - to work toward making change in OUR world.

Raise your hands - who wants to save the planet? Ah, yes, I'm sure you raise your hands, as do I, but are you truly doing all you can? Yeah, I recycle, live in a small place, had only one child, and drive a gas-efficient vehicle, but those are small steps that are no longer enough.

What is, then? Ah, I can't leave you without hope. No more small steps; take the LEAP! "A Call for Canada, Based on Caring for the Earth and One Another." Let's lead....NOW!" leapmanifesto.org

The writing of The Leap Manifesto was initiated in the spring of 2015 at a two-day meeting in Toronto attended by representatives from Canada's Indigenous rights, social and food justice, environmental, faith-based and labour movements.

This group says, "we could live in a country powered entirely by renewable energy, woven together by accessible public transit, in which the jobs and opportunities of this transition are designed to systematically eliminate racial and gender inequality. Caring for one another and caring for the planet could be the economy's fastest growing sectors. Many more people could have higher wage jobs with fewer work hours, leaving us ample time to enjoy our loved ones and flourish in our communities."

"We know that the time for this great transition is short. Climate scientists have told us that this is the decade to take decisive action to prevent catastrophic global warming."

This leaves us only 2 years & 4 months to get our act together, people! We ALL need to Leap! And we need to get all of our elected officials to Leap, as well!

Let these glorious winds blow us positive change and hopeful future for our stunning planet. And remember Margaret Mead's words: "Never doubt that a small group of thoughtful, committed citizens can change the world; indeed, it's the only thing that ever has". — JdW

**Safety at Work** Safety is a major concern at the manufacturing company where I work. So I'm constantly preaching caution to the workers I supervise. "Does anyone know," I asked a few guys, "what the speed limit is in our parking lot?" The long silence that followed was interrupted when one of them piped up. "That depends. Do you mean coming to work or leaving?"

## THIS WEEK'S HOROSCOPE

### Aries
